 COMMANDER TITAN  
 MILLICURIES-UNDER 25-3H  
 P6506.430.32.01

Model P6506.435.32.01  
 without date

Unique technology for unique watches:  
 H<sub>3</sub>-watches are the easiest in the world to read in low light conditions and even in total darkness. Thanks to its research, the Swiss company mb-microtec ag has succeeded in manufacturing a self-activated light source that is 100 times brighter than any previously available. The light-emitting devices require no battery power or any other form of charging, and never need servicing or maintenance.

H<sub>3</sub>-watches are equipped with a tritium light source. These tiny, airtight vials, sealed under high pressure, are resistant to water, oil and the most corrosive materials. A minute quantity of tritium lights up the dye. These merits have made H<sub>3</sub>-watches an absolute must in the emergency, safety and protection sectors as well as in the armed forces, but are also ideal for fans of adventure and sport.

H<sub>3</sub>-watches are top quality Swiss watches, extremely robust and proverbially reliable. A choice of fashionable colours and timeless, striking designs complete this outstanding timepiece.

Ref. Model	P6506.435.32.01*
	P6506.430.32.01
Model name	Commander Titan
Movement	Ronda Quartz
Waterresistance	200 m / 660 ft
Case	Titanium
Bezel	Carbon fiber
Size	45 mm
Case back	Screw on
Crystal	Sapphire
Crown	Screw on
Indicators	3-hands (h/m/s)
Strap	Nato
	* without date
